Presentation Topic

i5/OS V6R1 Announcement

Delivers IT freedom for business flexibility

On January 29th, IBM made numerous announcements that greatly enhance the i5 servers. On our February 12th meeting, You'll hear on how i5/OS will run in IBM BladeCenter, how one i5/OS partition can host virtual storage for another partition, new encryption capabilities, enhanced Java performance, enhanced performance with IBM storage area networks, a new approach to Web-based systems management, a major new disk clustering product, the latest on IBM Rational development tools and much more. It's going to be the most significant i5/OS release in years!

Reminder: Spring Common is coming soon. If you company is a member of STATUS be sure and contact our Treasurer, Jeff Crosby for you membership number. This will save you \$300 on your registration fees.
